

Central Florida ASHRAE Chapter Presents:

Energy Efficient Window and Fenestration Technologies

By: R. Christopher Mathis

Thursday, February 9th

**Social Hour 6pm
Presentation 7pm**

**Dubsdread Historic Banquet Hall
549 Par Street, Orlando 32804**

[Register Here!](#)

\$25 by PayPal or RSVP by Feb 6th

\$30 at the door or after Feb 6th

Recent advances in building technologies have made possible dramatically greater levels of energy efficiency in homes than ever before. From new fenestration and glazing technologies, insulation innovations, air sealing, advanced HVAC systems and new diagnostic tools all create new opportunities for anyone working with residential buildings. This presentation will provide attendees with new information about residential building technologies and ways to meet the new family of energy codes and “beyond code” programs.

R. Christopher “Chris” Mathis has spent the past 30 years focusing on how buildings and building products perform – from energy efficiency to code compliance to sustainability and long-term performance durability. Chris is also an on-going student of about 90 million years of sustainability and building science through his activities as a beekeeper.

Menu includes London Broil with Garlic & Herb Roasted Red Potatoes and Squash Casserole
